

Orthopaedic Physiotherapist

The CONNECT team and CONNECT clinic are growing! In addition to increasing our facility by almost 1,000 square feet, we're looking to add another orthopaedic physiotherapist to help us continue being the area's first choice for private physiotherapy, no OHIP, WSIB or MVA.

By thinking outside the box and taking an active approach to rehab, CONNECT has implemented initiatives such as Barbells4Bones and #NewMomStrong to compliment regular 1:1 sessions. We are a leader in both the healthcare and fitness world. We bring the two together which helps Grey Bruce change the way we think and manage our health.

In just three years, we've tripled the size of our team. We take time to mentor and coach each other. We schedule regular retreats where we set both individual and corporate goals not to mention our monthly team case reviews. Our environment allows you to flourish in your field of work and find the work life balance you desire.

At CONNECT, you would be a part of a like-minded clinician group that takes a holistic approach to care, creating an environment leading to patient success and excellent relationships with the medical community.

We provide clinicians full administrative support. From booking to laundry and everything in between. Our 3,500 (soon to be 4,400) square foot facility houses all the equipment and supplies you need so you can focus 100% on your client.

With a competitive fee split and the support to market and build your practice, we have your back. This fee split comes after a 6 month transitional period providing you time to build a caseload and settle into the area.

So, if you're a registered CPO therapist, have rostered in orthopaedics, and looking for a new opportunity, we want to hear from you.

To learn more about CONNECT and the Owen Sound area please visit our [Careers](#) page or contact us at admin@connectrehab.com. Thinking about relocating? We'd be happy to show you around.

What CONNECT offers

 Personal & Professional Growth

 Work/Life Balance

 Transition to Practice Program
