

PHYSIOTHERAPIST (ORTHO)

An exciting career means different things to different people. At CONNECT, excitement means thinking outside the box and taking an active approach to rehab. By implementing initiatives to compliment regular 1:1 sessions such as Barbells4Bones and #NewMomStrong, we are a leader in both the healthcare and fitness world.

To meet the growing demand of being the area's first choice for private physiotherapy (no OHIP, WSIB or MVA), we have increased our facility by 1,000 square feet including 4 new patient rooms. Now we need you. Someone who's definition of excitement aligns with ours and wants to work in an environment where like-minded clinicians take a holistic approach to care, creating patient success.

In addition to housing all the equipment and supplies you need; we provide clinicians full administrative support so you can focus 100% on your client.

With a competitive fee split and the support to market and build your practice, we have your back. This fee split comes after a 6 month transitional period providing you time to build a caseload and settle into the area.
