

PHYSIOTHERAPIST (PELVIC FLOOR)

As one of the fastest-growing women's health sites in Grey Bruce, CONNECT creates a positive healing environment where mothers can get back to the things they love.

Our #NewMomStrong group fitness series is designed to ease women back into exercise (with baby), while also providing a chance to build a support system. Led by two pioneering women, CONNECT is a leader in both the health care and fitness field. We take a holistic approach to patient care where like-minded clinicians are supported to create an environment leading to patient success. This holistic approach is what keeps us growing.

With a newly renovated 4,400 square foot facility, full administrative support, a constantly growing client list, and a competitive fee split, you can focus on building a caseload and settle into the area.

We house all the equipment and supplies you need and also provide full administrative support so you can focus 100% on your client.

With a competitive fee split and the support to build your practice (as well as a constantly growing client list), we have your back. This fee split comes after a 6 month transitional period providing you time to build a caseload and settle into the area.

If you're a registered CPO therapist, have rostered in internal pelvic health and want to make an impact, we want to hear from you.
